

ASSOCIATE ENVIRONMENTAL PROFESSIONAL

About the Company

Established in 1927 as Toledo Testing Laboratory, TTL Associates, Inc. has grown to be a full-service environmental, geotechnical engineering, industrial hygiene, materials testing and drilling firm. We focus primarily on the following markets: Commercial, Development / Redevelopment, Education, Energy, Healthcare, Federal Government, Local and State Government, Industrial, Retail and Transportation.

About the Position

Our **Associate Environmental Professionals** are active practitioners in a wide variety of environmental projects in the private and public markets, including the Federal Government. You will work under the guidance of a senior environmental professional and be given every opportunity to advance in your field.

Responsibilities

- Conduct Phase I Environmental Site Assessments (ESA), research, and report writing.
- Conduct Phase II ESA field sampling, data evaluation, and report writing.
- Conduct field sampling activities, including, but not limited to, soil sampling, surface water sampling, groundwater sampling, soil vapor sampling and stormwater sampling.
- Provide environmental and contractor oversight and logging for soil borings and monitoring well installations, using Geoprobe and drill rig methodologies.
- Conduct sampling and contractor oversight during underground storage tank (UST) removals and various remediation projects.
- Attend designated meetings and work with a diverse group of colleagues and clients.
- Plan, prioritize, and organize a diverse workload.
- Perform other duties as needed to support functional or department operations.

Requirements

- Bachelor's Degree in a related science or engineering discipline
- A minimum of two years of experience performing environmental field sampling activities
- OSHA 40-hour certification and current 8-hour refresher certification are preferred.
- Michigan and Ohio regulatory experience is highly desired.
- Asbestos- or lead-related certifications and experience in building materials surveys, asbestos abatement oversight, air monitoring or lead inspections are a plus.
- Demonstrated strong verbal and written communication skills
- Demonstrated strong organizational skills

- Technical proficiency with computers and Microsoft Word and Excel
- Excellent professional interpersonal skills in order to interact directly with clients and handle sensitive and confidential situations
- Ability to travel frequently on regional day trips and up to 25% overnight, depending on the project.
- A valid driver's license and an insurable driving record
- Successful completion of a pre-employment physical, drug screen and motor vehicle and criminal background checks
- As a federal contractor, employees of TTL must be fully vaccinated against the COVID-19 flu.
